

AFX HELMET SIZING FIT CHART

NOTE: THIS CHART IS FOR REFERENCE ONLY

Determine the circumference of the widest part of your head by using a flexible tape measure. Generally, the widest part of a person's head is the area 2.5 cm (1") above the eyes and ears. However, we suggest measuring at a few points both above and below that line to determine the greatest measurement before referring to our size table. We also suggest testing the fit of a helmet one size smaller and one size larger than what the chart recommends. No helmet can provide protection if it's too uncomfortable to wear. Please note the size measurements noted on these charts are meant as an approximation for fit. Helmet style (street vs off-road) and physical head shape may determine what size actually fits independent of the measurements listed below.

Note: Due to size and fit similarities between some Youth Large and Adult X-Small Helmets in the size chart noted above, It is the Parents /Guardians responsibility to determine if a Youth Rider may safely and comfortably wear an Adult sized helmet. Under no circumstances should a Youth Rider ever wear a helmet thats too large or too heavy to wear comfortably.
